

Roundabout Design Training

In response to numerous requests from across the Midwest, DLZ Corporation is proud to announce that we will be offering a two-day roundabout design training seminar in Lansing, Michigan for public agency employees. The seminar is intended for those involved in road planning and design including engineers, transportation planners, technicians, and supervisors. The focus of this training will be in two main areas. First, we will train attendees in the use of RODEL software for analyzing roundabout geometry, capacity, and traffic operations. Second, we will provide instruction regarding fundamental roundabout design principles and their application. Attendees will leave this course with a solid understanding of how to complete a roundabout analysis and design along with the relevant guidelines and standards which need to be implemented. The training is set up to allow significant time for interaction with the instructors and also hands-on applications. Additionally, there will be an optional "roundabout help" session on the evening of the first day. Our instructors will be available during this session to review and discuss your roundabout concepts or designs. All materials required for the class will be provided, including training versions of RODEL software, computers, a course handbook, refreshments, and a complimentary copy of the FHWA roundabout guide. We look forward to seeing you at the seminar.

April 23-24, 2007

Holiday Inn South – Lansing
Conveniently Located Just South of I-96
on Cedar Street in Lansing at 6820 South
Cedar Street, Lansing, MI 48911.

Roundabout Design Training

Topics

- Use of RODEL
- Capacity Analysis
- Safety
- Pedestrians and Bicycles
- Geometry
- MDOT Roundabout Guide
- Construction Documents
- Vertical Design and Detailed Grades
- Pavement Markings and Signing
- Trucks
- Lane Consistency
- Sight Distance
- Landscaping
- Maintenance of Traffic

Instructors

Sean P. Riley, P.E.

Wes Butch

Stephen G. Metzger, AICP, PWS

Jason T. Whitten

Monica Uribe-Montes, P.E.

Agenda

Monday, April 23

- 8:30 - 9:00 Registration
- 9:00 - 12:00 Introductory Design Concepts
- 1:00 - 5:00 RODEL Analysis and Applications
- 5:00 - 7:00 Roundabout Help Session (*Optional*)

Tuesday, April 24

- 8:00 - 10:00 General Design Instruction
- 10:00 - 12:00 Design #1: Simple Roundabout
- 1:00 - 2:30 Advanced Design Concepts
- 2:30 - 5:00 Design #2: Complex Roundabout
